DETAILED ACTION

The previous restriction requirement is withdrawn and replaced by a corrected restriction requirement, in this Office action.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 16-23, and 25-27, drawn to a stage device and exposure methods using plural alternating stages, classified in class 355 subclass 53, or 356/500.
 - II. Claims 10-15 and 24, drawn to an interferometer and method with plural interferometric axes and correction, classified in class 356, subclass 500.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I. and II. are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because independent claim 10 and its dependents do not require a plurality of movable stages. The subcombination has separate utility such as for correcting movements during inspection of a single moving stage (rather than in alternating corrections of plural stages).
3. Because these inventions are distinct for the reasons given above and the search required for Group I. is not required for Group II., restriction for examination purposes as indicated is proper.
4. A telephone call was made to Peter A. Balnave on 1/5/01 to request an oral election to the

above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phil S. Natividad whose telephone number is 703-306-5944. The examiner can normally be reached on Tuesday-Thursday and alternating Mondays.
